

COMMUNITY-DRIVEN MUNICIPAL MODEL

One Life. A Fair Shot.

People are the community's greatest resource.

10-minute municipal presentation

Created and developed by Bola Ademolu

PROPOSED FRAMEWORK FOR MUNICIPAL ANALYSIS

The human purpose of CDMM

CDMM is about giving people a fair shot at the one life they have. It invests in people as the community's greatest resource, removes barriers that leave human potential unused, and builds community capacity that grows with its people and can be passed from one generation to the next.

Human worth remains unconditional

The productive resource principle concerns capacity and opportunity. Economic productivity never defines the value of a human life.

CIRCUMSTANCES CAN CONCEAL CAPACITY

Nine Autonomies. One Connected System.

01 Housing Autonomy

**02 Municipal Grocery
Autonomy**

03 Fuel Autonomy

04 Healthcare Autonomy

**05 Transportation
Autonomy**

**06 Workforce & Skills
Autonomy**

**07 Resource Development
Autonomy**

08 Energy Autonomy

**09 Digital & Communications
Autonomy**

Foundational Homes and Municipal Tiny Homes sit within Housing Autonomy. Meaningful Community Voice applies across the system as a governance principle.

Underutilized human capacity

BARRIER CYCLE

Instability
Survival demands
Reduced opportunity
Underparticipation
Capacity unseen or underused
Continued instability

HUMAN-CAPACITY PATHWAY

Stability
Opportunity
Participation
Contribution
Greater community capacity
Reinvestment in people
More capacity unlocked

Lived experience involving Bola, Courtney, Romeo and other community members helped shape FH, MTH and the ownership direction.

The CDMM System Effect

Housing

Healthcare

Workforce

Stable homes support health and participation. Workforce capacity affects construction and care delivery.

Grocery

Transportation

Energy

Food access depends on producers, distribution, refrigeration, mobility and reliable operating systems.

Digital

All Autonomies

Shared layer

Connectivity supports operations, access, data, accountability and emergency continuity.

Shared assets can create economies of scale and scope. Shared dependencies can also transmit labour, power, cyber, capital and supply risks.

Municipalities write their own story

Rural communities

Small towns

Regional municipalities

Urban municipalities

The architecture stays consistent. Local people, geography, resources, infrastructure, history, law and priorities shape the mix, scale, sequence and delivery vehicles.

Municipalities develop local capacity within each field. Provincial and federal governments retain their legislative, regulatory and funding responsibilities. Indigenous rights, title, treaties and Crown consultation obligations remain fully applicable.

Invest in Ourselves

Municipal capacity

Productive assets

Local participation

Reinvestment

Municipal enterprises, strategic land, procurement, wages, supplier relationships and community assets can influence how value moves through a place.

**Local wealth circulation
remains measurable**

Track household costs, contracts, imports, leakage, debt service, operating results and renewal needs.

The municipal bank concept remains a financing component for legal and feasibility analysis. It is not a tenth Autonomy.

Voice, accountability and inheritance

Being heard is not the end of the process. Being taken seriously is.

Voice
Response
Representation
Escalation
Accountability
Trust

Community Inheritance

Build
Retain
Reinvest
Protect
Improve
Pass forward

Future generations may inherit stronger assets, institutions, knowledge and opportunity. Outcomes remain conditional on performance and stewardship.

Evidence and scenario status

Established Evidence

Existing Program or Policy

Existing Legal Authority

Comparable Precedent

CDMM Proposal

Scenario-Modelled Outcome

Required Legislative Change

Area for Further Research

Comparable individual mechanisms do not establish the performance of the complete CDMM architecture. Scenarios remain conditional results, not forecasts or guarantees.

A framework for informed municipal discussion

One Life. A Fair Shot.

Nine Autonomies. One Connected System.

CDMM provides a human purpose, an integrated architecture, analytical tools and source material. Municipalities retain responsibility for their own evidence, lawful process and decisions.
